

Report – High School Swimming Observed Meets

VSI was responsible for the observation and entering into SWIMS of 11 HS meets during the period of January and February. This involved 186 teams and 3156 athletes. Each meet had to be screened to find the USA Swimming registered athletes and properly identify them in SWIMS so that their times could be assigned. I figure that it took me at least 4 hours per meet and sometimes much longer, however it seems to have gone smoothly. I have a full TM database with the full results of each of these meets and also the state AAA meet which was observed by PVS. If swimmers or coaches need splits or relay lead off legs they are available but have not been put into SWIMS unless requested. I am very grateful the officials who ably helped with these meets and got the information to me in such a timely fashion.
